

## FAQ

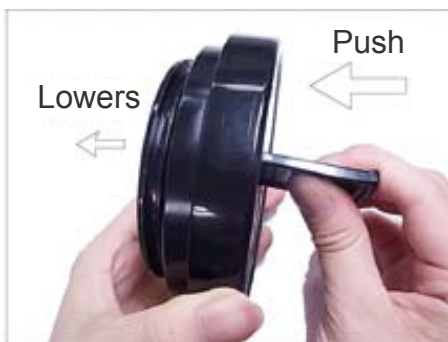

Canister

Q. Please tell me how to take care of a coffee canister.

A. Remove only the rubber packing while the knob of the lid is standing and wash it with a neutral detergent. (Please don't disassemble the lid.)

When it is completely dry, assemble it as follows:

1. Raise the knob of the lid and push it. Then the lower part of the lid lowers.

2. As illustrated, hold the lid and continue to push in the knob.

3. Hold the lid vertically and fix the rubber packing into the groove on the lower part of the lid.

4. If the rubber packing spreads when the knob of the lid is put down, it's done.
